

# Processing Solution

Built on Microsoft Dynamics 365 Business Central

## From beginning to end

The Wisefish comprehensive solution enables fish processing companies to enhance traceability and gain valuable insights into the costs of producing goods.

With this innovative software, users can easily track every aspect of the production process, from the initial raw materials to the final products. The traceability feature provides a clear view of the origin of each product and the processes it has undergone.

The solution also offers detailed cost tracking, allowing users to allocate costs accurately to each product produced. This powerful functionality enables users to make informed decisions, optimize the processes, and ultimately increase profitability.

Wisefish  
processing is  
developed  
alongside our  
most demanding  
customers  
across the globe

Key benefits of our processing solution

- **Full traceability of raw materials to products**
- **Direct reservations of produced entries to Production Agreements and Delivery Agreements**
- **Full support of irregular items (such as whole fish in master boxes) as well as regular "same weight for each box" production**
- **Flexible Bill-of-materials for regular production as well as 3rd party production, repacking production and relabeling production, with BOM versions.**
- **Recall analysis**
